

WEBSITE OPTIONS

A website built for The Transaction Club

Peter, here's a quick look at what your site needs to do, the three ways I can build it, and the option I'd recommend based on where you want to take it.

What you need

02

Three ways to build

03

My recommendation

YOUR PROJECT

What the site needs to do

The Transaction Club manages real estate sales files. You're looking for a three- to five-page site that does four jobs. Your budget and design direction are still open.

Bring in consultations

A clear path for prospects to send a consultation request.

Show completed work

A portfolio or gallery of closed transactions.

Offer online booking

Clients pick a time and book directly on the site.

Let clients track progress

A login where clients can check where their file stands.

KEY FACTOR

The client portal is the feature that changes the scope most. Tracking and booking both require a custom build, so they decide which option fits.

NEED	MONTHLY	LUMP SUM	ENTERPRISE
Consultation request form	✓	✓	✓
Portfolio or gallery	✓	✓	✓
Online booking	—	—	✓
Client progress portal	—	—	✓

YOUR OPTIONS

Three ways to build the site

Every option includes a custom design, a consultation request form, and a portfolio or gallery. The difference is ownership, ongoing support, and whether custom features are included.

OPTION 01

Monthly subscription

\$125 / month

Six-month minimum, then month to month

- Up to five pages
- Custom design
- Hosting included
- Consultation request form
- Portfolio or gallery
- Unlimited edits, 24/7 support, and lifetime updates

Ownership: MigsFlow owns the site; a buyout is available.

Extra pages: \$100 one-time fee per page after five.

OPTION 02

Lump sum

from **\$1,250**

One-time payment

- Up to five pages
- Custom design
- Consultation request form
- Portfolio or gallery
- 30 days of post-launch support

Ownership: You own the site outright.

Hosting: \$25 / month if needed.

Extra pages: \$100 per page.

RECOMMENDED

OPTION 03

Enterprise system build

from **\$2,000**

Quoted per project

Everything in the lump sum option, plus scoped features:

- Client portal
- Online scheduling
- Automated follow-up
- CRM integration
- Estimates or deposits
- Custom backend work

Pricing: Custom scope and price. The monthly subscription does not apply.

A consultation request form collects inquiries; it does not book appointments on its own.

MY RECOMMENDATION

The right fit for your clients

RECOMMENDED

Enterprise system build

From \$2,000

If clients need to log in and track their transactions, Enterprise is the way to go. It supports a client portal and online scheduling. Your final quote is based on the client views, status updates, access rules, and integrations you need.

The \$125 monthly subscription is not available for this build.

SMALLER FIRST PHASE

Lump sum · from \$1,250

Gets your public-facing site online with up to five pages, a consultation request form, a portfolio, and full ownership. We can scope the portal and direct booking later.

PUBLIC SITE ONLY

Monthly · \$125 / month

Includes hosting and ongoing edits for a public-facing site, with a six-month minimum. MigsFlow owns the site and you can buy it out. No portal or direct booking at this price.

SUGGESTED NEXT STEP

Let's talk through the details

From there, I can quote the custom build or outline a smaller first phase.

01

What clients should see in the portal

02

How files get updated

03

Scheduling or CRM tools you already use
